

Dear City Council

2-6-19

On Jan 29, 2019 trash and recycle was not picked up due to weather which is understandable.

The following week again recycle was not picked up to keep it on track. When I called City Hall was told the recycle was not suppose to be picked up however the truck came and very little recycle was out so they did not pick up. I drove down North

Oak street and there was 6 ~~of~~ different homes with it out including me. I did not drive all the way down the street. So now for two weeks I have carried garbage to the street and back to the house yes I had to do it in the elements that the company I pay could not. I also work a full time job that I worked all the weather days not being late for work.

The money that I would be credited would be minimal however I want a credit for the weeks

trash was not picked up for the fact that I have been put out and no one seems to care. Yes they may have picked up double ~~some~~ some places I however had one extra bag. The trash company did not pay someone the day my trash was not picked up nor did they pay for gas because the truck did not come. I should not have to pay for a service I did not

receive I am the only one that did double the work. I can not leave stuff on my road way because our city workers do a great job plowing my street and I want that to continue so my road way is clear because I appreciate the great job they do and did during the great storm.

536 N Oak St  
Evanston MI
