To: Honorable Mayor and Council Members

Re: Request for Council Action – Police server tower

The server at the Evart Police Department has required on-site servicing twice in the past 6 months in addition to multiple remote diagnostics, all which were performed by IT Right. After the most recent on-site servicing a recommendation was made by IT Right that our server tower be replaced as soon as possible to avoid the possibility of data loss and to maintain network operations.

IT Right provided us with a quote that came in higher than expected so we received other quotes from two other computer companies for a server of equal specifications. It was learned during our exploration IT Right included labor cost so a new quote was obtained from them to reflect the purchase of a server without labor costs.

Comparing the quotes to each other, IT Right is competitive with one other company, but that company was only able to provide comparable specifications and not the exact same specifications as IT Right. The third quote came in hundreds of dollars higher than IT Right's quote.

It is my recommendation we purchase the server tower through IT Right since they provide our technical support and are knowledgeable on the specifications required for the department operations. Additionally, the labor cost was removed off the original quote because we currently have a contract with them for their services.

The above information has already been shared with the Police Committee who was in favor of the investment. I respectfully request council action to make additional funding available in the Computers and IT line (101-301-932-000) to allow the purchase of a new server tower, totaling \$3,144.81.

Respectfully,

John Beam Jr.  
Chief of Police  
Evart Police Department

Monique –

I am required to obtain three quotes for purchases of this amount. Can you please provide a simplified list of features that we can provide to other vendors to obtain those quotes? Basically – I need a list of minimum requirements on the system that we will be needing. Is that something I can get from you? Thank you in advance for your assistance.

\$812 for the software if getting hardware elsewhere... but most servers will come with the OS installed.

Our labor to install the OS/ and configure the server would stay the same. (\$1440)

Jarud would like to review the hardware config before you buy it to make sure it meets your needs. This is a courtesy we extend all our clients. We do not require you to buy from us and we want to make sure you are getting what you need.

Our server comes with a full 3 year warranty.

Monique – we will also need to know what you would charge us to install a copy of Microsoft Server on a machine if we bought the server from another company. Is the server install and setup included in our service contract with you? If not, I will need a break down on that pricing as well. Thank you.
